

Casey Architectural Lighting dazzles the Marriott O'Hare Airport

Three large floating discs are suspended from the ballroom ceiling providing a decorative feature to this grand space. Each disc combines surface mount cylinders, pendant cylinders and flexible tube LED lighting that meanders around the disc protruding through the circular openings in the cylinders.

The wavy, linear, continuous LED pendant adorns a conference room. Functional down lighting is mounted in the ceiling canopy to provide necessary illumination levels.

In the corridors, five rows of suspended "linear" LED acrylic tubes are grouped together to give the appearance of a large chandelier. The glass tubes have an internal frosted tube, an external clear tube and provide 360 degrees of illumination. They're connected by bent tubing to complement the design patterns in the floor and maintain the wavy theme throughout the facility.

The Casey Architectural Lighting installation team assisted the contractor to make this project a success.

Whether a large or small project, we can meet your custom lighting needs.

No matter the venue you are lighting, the creative design team at Casey Architectural Lighting is there to assist. Whether you have a design concept in mind or you need creative assistance in developing an attractive design element for your project, our creative team is there for you.

The process first begins with meeting the illumination requirements to ensure that the lighting is not just a design element, but also effectively meeting your lighting needs.

Once the illumination specifications are met we then turn our full creative design talents to making the lighting fit seamlessly into your project.

Scale, aesthetics, finishes, quality in workmanship, ease of installation and maintenance, and safety are all given stringent consideration on our way to the final design.

Delivery and installation of the final product is always exciting, as the culmination of concept, design, fabrication, finishing, assembly, testing, and installation all come together to complete your vision.

Some projects have such unique and complex requirements that we send some of our lighting experts on site to advise and assist with any field assembly and installation. While not every project will require this, rest assured that we provide whatever level of support is needed to complete your project.
